

FJ Doll Manual

Thank you for your support and trust in our company. we recommend that you read this manual before you using the doll. The outer layer of this product is made of new polymer material TPE (thermoplastic elastomer) or platinum silicone, and the inner layer is constructed of epoxy resin and various metal joints. The material is safe for human direct skin touch and environment.

Product packaging

All the love dolls are packed with special made carton, inside the carton, dolls are protected by foam material. Each doll is individually packaged.

Each package contains:

- 1) Physical doll*1
- 2) Gift package: 1. Lower body USB*1, heating rod*1, 2. Erotic underwear*1, 3. Lower body cleaner*1, 4. Comb*1, 5. Gloves*1, 6, blanket*1

Product function and use

use of the product

1. Usage

Costume Display, Cosplay, Collection, Companion, Sex partner.

Note: Customers who use it as a sex product need to be hygienic and cannot share it with others.

2. Unpacking

The physical doll is a work of art, so unpack it to avoid scratching the surface of the doll. Use the labor-saving princess hold method to carry the doll out.

3. Product assembly

Mount the head and body

- 1) Ordinary traditional screw: first screw the screw to the head, then clamp the head on the neck of the doll, and screw it in until it finds a suitable natural position;
- 2) Quick-release screw: First, connect the threaded side of the screw to the head, find the right position, and connect it to the body with a single tap.

4. Range of motion of love Doll

The body of the doll is equipped with various joints, which can be in various poses within a certain range. However, because the product is in a straight posture when it leaves the factory, the doll cannot be placed in a difficult bending posture for a long time, so as to avoid glue somewhere. The material is deformed and damaged due to long-term pulling. The arms and thighs cannot be opened in a very large arc for a long time. After use, please restore it, and let the doll lie down with both hands hanging on the sides of the body (for non-standing solid dolls, remember not to let the doll stand) , The manufacturer will not be responsible for any damage to the doll caused by improper use.

5. Use and description of optional functions

Sucking& vibration function(Robot Vagina)

There are two version of remote control and wired controller, TPE is currently the wired version, and silicone is the wireless remote control version.

Wired version

Information:

- a, Lithium battery capacity: 600 mah
- b. Use time, about 60 minutes.
- c. Maximum suction: -0.4 bar
- d, maximum noise: less than 30 decibels.
- e, vibration frequency: divided into 10 frequency bands.

Instructions for usage:

- 1) Please use DC-5V to charge, the charging time is 2-3 hours.
- 2) There are two modes of inhalation and air release.

Both the heating function TPE and the silicone body can be customized. Normal heating is red, full value is green. The heating time of silicone material is recommended to be 40-50 minutes, and that of TPE is recommended to be 10-15 minutes.

voice

Voice function with Chinese and English versions of simple dialogue, touch the lower body, breasts, inner thighs to make voices. This function is mainly based on moaning.

Precautions

- (1) Before use: It is recommended to clean the private parts first, which can be disinfected with 75% medical alcohol mixed with water.
- (2) When using: Human body lubricant must be applied to make the inside of the appliance have sufficient lubricity. To ensure a safe guard, wearing a condom is recommended. If the inside of the doll is not lubricated enough, the sexual interest will decrease and it will easily lead to cracks in the private parts.

(3) After use:

Cleaning: Take a bath and wash directly below the neck, and it is strictly forbidden to touch the water above the neck! Gently wipe the head with a clean wet towel or cotton swab to ensure the longevity of the doll's makeup. If your makeup is damaged accidentally, you can make up for free when you return to the factory. You can directly rinse your genitals, or you can use a vaginal cleaner (free gift). Rinse the inside of the private parts with water, use 75% medical alcohol mixed with water to wipe the device; then soak it in warm water for 2-3 minutes, dry it naturally or dry it with a dry cloth, and store it in a dark place for storage. It is recommended to wash once/10 days to ensure the skin quality, feel and service life of the doll. Be careful to avoid rinsing with strong alkaline detergents or bleach.

Powder coating: Avoid vigorously scratching the surface of the doll with fingernails. After washing, wait for the surface to dry. Apply the distributed talcum powder evenly on the surface to protect the skin of the doll.

(4) Do not scratch the surface of the skin with sharp instruments, and do not forcefully probe and pinch to avoid damaging the skin and affecting the use time and appearance.

(5) When wearing clothes, dolls should avoid wearing clothes that are easy to fade or have poor coloring technology, so as not to contaminate the inverted skin and affect the appearance.

(6) Avoid direct sunlight for storage, so as not to cause the deterioration of the rubber material and affect the service life.

Repair Instructions

(1) Stain&Stain Removing

Use the stain remove ointment specially designed for TPE thermoplastic elastomer dyeing, which is efficient, convenient, fast and non-toxic, and can remove local dyeing within a period of time. . Stained areas will naturally fade over time after application, repeat every four hours until removed. The fading time is determined according to the depth of the dyeing, and the fading of small areas of dyeing will generally be completed within 24 hours. Severely stained ones are usually removed in 3-4 days.

(2) Tear

If there is a small area of damage on the surface of the doll, it can be glued with repair glue. First clean the damaged surface, restore the glue at the wound to its original position, then apply a layer of glue evenly, and wait for about half an hour to dry. Then you can. If there are other technical problems, you can directly contact the seller or the manufacturer, and the manufacturer will provide processing technology as the case may be.

(5) Indentation

If there is an indentation on the surface of the doll due to pressing for a long time, you can apply a hot towel to the area for a period of time.

(6) Finger puncture

If the finger skeleton function is optional, if the finger is improperly protected and accidentally pierced, it can be pierced with repair glue and left for a period of time.

Warranty Description

The physical doll brands represented by the Entity Doll Home are all directly supplied by the manufacturers and enjoy the after-sales service of the brand manufacturers.

- 1) From the date of ordering the physical doll, the customer can enjoy the service of free makeup once within half a year.
- 2) Customers can enjoy free warranty service within one year from the date of ordering, but a certain fee will be charged for damage caused by improper personal use or extremely serious damage, depending on the degree of damage, location and area quoted. .
- 3) The round-trip shipping costs incurred by returning to the factory for repair or make-up shall be borne by the customer. Due to the risk of loss or damage during the express delivery process, it is recommended to insure the price, and we can also ask us to insure the price when sending it back after repair. However, if the customer does not ask for the insured price, it means that the customer already understands and is willing to bear the risks brought by transportation.
- 4) After-sales service and standards for physical dolls are implemented according to the after-sales standards shown on the brand's official website.
