

Sino-doll.

The Best Experience

■ Product specifications and parameters:

Serial number:	Production date:
Model number:	Head number:
Skin color:	Eyebrows:
Skeleton:	Fingers:
Vagina:	Eyes:
Pubic hair:	Wig:

■ Standard accessories:

Product manual / wig / random outfit / heating rod / comb / gloves / cleaning syringe

■ Notes:

1. All dolls are purely hand -made,so there might be seamlines,repairing scars,dust or bubbles on the skin surface;It is normal that if the radius of dust particle and bubbles on the surface are less than 0.5cm.
2. There are movable metal joints inside the dolls, please handle it correctly according to the operation instructions, otherwise it may cause breaking or dislocation. In these circumstances,it is not a product quality problem.
3. Please return the doll to the position when you receive it after using; It will increase the risk of damage if keeping it in unnatural state for too long time.
4. As all dolls are purely hand made,the weight tolerance within 3kg or height 3cm are normal conditions.

■ Manufacturer:

Guangdong Sino Environmental Technology Co.,Ltd.

Our company is committed to producing perfect human proportion silicone entity doll, exploring and developing: AI intelligent simulation robot, intelligent entity dolls and silicone medical supplies, silicone intelligent toys; With continuous improvement of product intelligence,refinement and simulation to make your life full of fun, joy and technology.

■ Product profile

All Sinodoll are made of platinum silicone material,which is a non-plastic material, can not be recycled and reused; And it has no pore characteristics, which makes it with high safety, low allergies and easier to clean;So you can have more private contact with them. With simulating skin,humanlike flexible joints, hyper realistic sculpture and perfect face, Sinodoll will give you a more realistic experience.

■ Disclaimer

The way of using the products is a personal act of the customers and we are not responsible for any actions or events therefrom.

All product images of Sino-doll are independent original sculptor works,any resemblance of any face from our products a living person is purely incidental.

Without the authorization of our company, the products shall not be used in commercial act, publicity, or film/television; And we reserve the right to be held accountable for related acts.

Due to the privacy and the particularity of the product, once the customer used the product, it is not possible to return or exchange goods.

After unboxing, if the customer find the product has been damaged , please contact Sino-doll to get further assistance ASAP. Thank you for your understanding!

■ Special Notes

1. Because the tensile strength of the material itself is limited, please don't keep the doll in any unnatural position or at an excessive angle for a long period of time, otherwise it will cause tears on the surface of the skin.
2. For dolls with standing-up ability, the bottoms of the feet should fully touch the ground; Soft materials under the feet are suggested, otherwise, standing for a long time can lead to a broken foot.

Foot completely on the ground--correct

Tilted fore foot--wrong

Tilted heel--wrong

3. Please follow the instructions strictly when making different postures for the doll; Incorrect operation can result in skeleton break or joint dislocation.
4. Please be careful about the doll's mouth, eyes, vagina or other thin parts; Excessive strength may cause tears.
5. When cleaning dolls, Do not let any water into the head connection part when cleaning the doll; Too much water inside can cause metal rust and odour.
6. If your doll is with removable insert vagina, you need to use lube for the doll's vagina when installing the removable so as not to cause any vagina tears.

■ Optional Functions Instructions

Heating function:

1. If your doll has heating function, please read the heating function instructions carefully before using and follow the instructions strictly.
2. You must unplug the heating power cord when using a doll and never use it under the condition of power-on to avoid unforeseen loss and injury.
3. The heating temperature will be slightly different on different parts of the doll due to different thickness of the skin layer of the doll.
4. The head, breasts, arms, buttocks, palms, feet and the vagina of the doll do not have the function of heating.

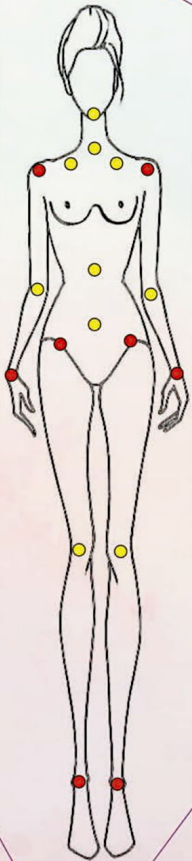

Sound System

1. If your doll has the option of sound function, please read the sound system relevant instructions in detail before using and please use them strictly in accordance with the instructions.
2. You can trigger the playback of corresponding audio sound by saying the specified statement (name or phrase) during using.

■ Warning

1. Do not soak the doll with heating function in water for washing; And make sure that no water can enter into the doll's body, otherwise the heating system will be damaged; Serious safety problems such as short circuit may happen.
2. Intelligent heads can only be washed on surface. And make sure that no water can enter into it, otherwise the heating system will be damaged; Serious safety problems such as short circuit may happen.
3. Dolls with heating function can not be used when electrified, and the heating power cord must be unplugged during using.

Doll's Inside Skeleton Diagram

The whole skeleton joints of Sino-doll body can reach 20 groups/50 sections (some are optional); Please strictly follow the instructions when using it; Incorrect operation will cause irreversible damage such as fracture or dislocation of joints.

When making pose, please complete it with both hands:
Press or hold the joint with one hand and pose with the other hand.

Note: Too much split movement is not recommended, as this kind of movement will put the doll in too much tension, which will be easy to cause damage. Be sure to operate carefully.

Skeleton Operation Range Description

Head

You can nod or bow the head or rotate it horizontally; The range of movement in 4 direction can not exceed 45 degrees.

Shoulder and Upper Arm

The upper limb of the doll can be raised 180 degrees forward and 5-10 degrees backward vertically; It can be raised horizontally to the chest level; the upper arm can be closed 15 degrees to the inside of the body.

Forearm and Wrists

The doll's arms can be raised 90 degrees forward, but can not be bent backward; The elbow joints can be rotated horizontally at 180 degrees. The wrists can be bent up and down, and the rotation angle is 45 degrees.

Waist

The waist can be bent horizontally to the left and right, and the angle is less than 30 degrees. Bend forward or bend back within 40 degrees.

The upper part of the body can rotate horizontally to the left and right, with a rotation angle of 40 degrees. If rotate and bend at the same time, the angle will be halved.

For example, bend forward and turn left at the same time, the maximum angle in each direction is 20 degrees.

Legs

The legs can be separated to a maximum of 130 degrees between thighs; Single leg can be raised at 90 degrees sideways, 90 degrees forward, 15 degrees backward, and 15 degrees inside (all based on the vertical line of the body)

Knee and Ankle Joints

Doll's calf can be bent back up to 120 degrees, recommended angle is 100 degrees, can not be bent forward.

The ankle can rotate up and down, total angle is 45 degrees, can not rotate too much.

Finger Joints

Finger joints are optional. The knuckles are designed to be humanoid. They can be bent 45 - 90 degrees forward, but not backward.

Sinodoll Skeleton Movement Limit

Reference Images

Although Sinodoll can perform most human movements, there will still be some explicitly prohibited movements, because of silicone material stretching limitations, for details, please refer to skeleton movement operation instructions and special notes. Please return the doll to the position when you receive it after using; It will increase the risk of damage if keeping it in unnatural state for too long time.

■ Dolls Maintenance

Skin care and cleaning

It is normal if there is oil leakage on the doll skin surface after long time storage, as this is the characteristic of ultra soft silicone. You can wipe the surface with soft towels.

In order to maintain good performance and surface cleaning of the doll skin, please clean and maintain it once in a while, usually once or 2 times within one month.

Clean the doll surface gently with sponge or lint-free towel dipped in warm water.

Neutral shower gels can be used repeatedly if there are dirt on it.

After thoroughly drying the surface of the puppet,

Put a thin layer of powder on the surface of the doll after thoroughly drying off.

Make-up Maintenance

The painting on the doll is with special treatment and will not fade easily; But please don't wipe it too hard or clean it with any chemicals. The doll's makeup may gradually fade over time, which is the normal phenomenon.

Prevent Stains

Please don't place the doll on leather or leather seats or other objects containing oil-soluble pigments for long time and do not use decolorized clothing or ornaments.

Storage Environment

A good storage environment can greatly prevent the aging of silicone skin and parts. Prolonged sun exposure or long-term exposure to excessive humidity should be prevented.

Storage Requirements

The dolls should be kept in dust-free environment to avoid cleaning inconvenience.

Water must be prevented from entering the doll's body when you are doing cleaning, so as not to cause damage or corrosion to the doll's internal structure.

Also please avoid squeezing too much, long-term squeezing will cause deformation.;

Do not place heavy objects on the doll.

If you need to keep the doll in long-term sitting position, please put soft towels under the doll's arms and thighs so as to avoid long-term heavy pressure to make it deformed.

For long time storage, the doll should be returned to the factory default state. Incorrect long-term storage posture can occasionally lead to folds, cracking, etc.

■ Silicone Skin Damage Repair

Prevention of damage

Improper use could lead to tears or wrinkles as the silicone skin of the doll is very soft. Therefore, keep the knives or other sharp objects away from the doll. If slight damage occurs, please use the special repair silicone glue delivered by the original factory to repair immediately (liquid items can not be sent with the doll abroad, so foreign customers please contact our sales staffs separately to purchase).

DIY Repair

Please first clean the damaged areas and it completely dry. Then apply the repair glue to the damaged area and press the wound to the closing state and fix it; Wait until the repair glue is totally dry and solidified. If the damage is a hole, please first restore the doll to factory default posture and then clean it; Use the repair glue to fill the hole and make the surface flat, then wait until the repair glue is totally dry and solidified. The curing time of the special repair silicone glue delivered by the original factory takes more than 24 hours (in cold weather, the time will be extended), please pay attention not to move or squeeze it during this period.

Back to Factory Repair:

If the damage cannot be repaired by yourself, you can also contact our customer service staffs; If we confirm that the doll can be shipped back to factory for repair, we can provide this repair service but need you to pay for the round trip freight. Silicone is a non-plastic material, there might be scars after repairing and the size of the scar will vary depending on the degree of damages.

■ Location Hole Scars and Seamlines

In the production of dolls, the casting of silicone may cause slight impurities and markings, but this does not affect the beauty and use of the doll. Kindly please note that the doll's body may have different sizes of skeleton positioning points and seamline marks, they are inevitable during production process, not defects.

■ After- sales service

Thank you for purchasing Sinodoll series products.

Sinodoll are made of high-safety platinum silicone material. Due to the characteristics of the material, improper storage or move may cause skin damage on the dolls' surface. For new Sinodoll purchased from official channels, we offer free maintenance service within half a year from the date of sale and free makeup service once a year (man-made damage is not included in the free repair), but you are required to pay round trip freight.
